In Memoriam

GEORGE W. SENTELL.

CHARITY HOSPITAL, }
STATE OF LOUISIANA, }
NEW ORLEANS, January 1, 1896. }

At a regular meeting of the Board of Administrators held December 2, 1895, the following action was taken :

To the Board of Administrators :

Your committee appointed to draft a report expressive of the regret of this Board at the death of Mr. George W. Sentell, one of their members, beg leave to report :

The demise of this estimable gentleman takes from the Board of Administrators one of its most zealous and able members, one whose conscientious labors contributed much towards the enhancement of the great work of the Hospital. Faithful in the performance of his duties and rigidly requiring that exactness from others that he marked out for himself, he honestly administered his trust. His labors were never perfunctorily discharged, but as thoroughly bestowed as upon his own large and successful interests. His reputation as a merchant and his well established probity as to character need no eulogy, his long and respected career attests to them ; be it

RESOLVED, That this Board sincerely laments his death and chronicles the fact that the Hospital has lost one of its most efficient co-operators, whose services were always appreciated ;

RESOLVED, That this report be spread upon the minutes of the Board, and a duly attested copy, under seal, be transmitted to the family of the deceased.

Respectfully submitted,

E. T. SHEPARD,
GEORGE SEEMAN,
J. T. GIBBONS.

In Memoriam

JOSEPH A. SHAKSPEARE.

CHARITY HOSPITAL, }
STATE OF LOUISIANA, }
NEW ORLEANS, February 26, 1896. }

To the Vice-President and Board of Administrators:

In attempting the fulfillment of a sad duty, your committee, appointed to draft an expression of our bereavement in the loss of an honored and beloved member, would respectfully declare its inability to formulate in words the deep sorrow which has befallen this Board, this community, and especially the needy and distressed, in the death of Joseph A. Shakspeare.

From earliest boyhood to the close of life, the whole career of our deceased friend and fellow-member was distinctly marked by a straightforward and generous disposition, an unbending integrity, commanded by a powerful will and a clear judgment. Imbued with the purest principles, his purpose in life was shaped by a consciousness of responsibility reaching far beyond the narrow aims of personal ambition.

His qualities of mind and of heart made him by nature, and without seeking, a public man. Moved by the influence of public necessity, his fellow-citizens accorded to Joseph A. Shakspeare the highest positions as belonging to him by the inherent right of special fitness.

Whether in private life, or in official position, persistent and indomitable energy furnished his methods of success. In the death of Mr. Shakspeare, the Board has lost a wise counsellor and an earnest and indefatigable member; be it therefore

RESOLVED, That this Board sincerely deplores his death as the loss of one of the most efficient co-workers in the interest of the Charity Hospital;

RESOLVED, That the name of Joseph A. Shakspeare needs no eulogy, being already enshrined in the hearts and memory of a grateful people.

RESOLVED, That this expression be spread upon the minutes of the Board and a duly attested copy under seal be transmitted to the family of the deceased.

Respectfully submitted,

E. T. SHEPARD, M. D.,
W. G. VINCENT,
R. E. CRAIG.

ATTEST:

EDWIN MARKS,
Secretary.

ANNUAL REPORT
OF THE
BOARD OF ADMINISTRATORS OF THE CHARITY HOSPITAL.

For the Year Ending December 31st, 1895.

CHARITY HOSPITAL, }
STATE OF LOUISIANA, }
NEW ORLEANS, February 3, 1896.

Murphy J. Foster, Governor of Louisiana, and Ex-Officio President of the Board of Administrators of the Charity Hospital, New Orleans:

Your Excellency—At the beginning of the new year, and as required by custom and law, it is my pleasing duty to submit to your consideration the appended annual reports of the officers of the Charity Hospital for the twelve months just ended.

With sorrow and regret we record the demise of G. W. Sentell and J. A. Shakspeare, our esteemed colleagues, which deprives the State of two worthy citizens and faithful officers, and this Board of two zealous and useful members. Also, of Mr. Charles DeMahy, our efficient Clerk, who performed the exacting duties of his office conscientiously and satisfactorily.

Among the good Sisters, three of their number have passed away, after a life-long service of self-abnegation and devotion to their mission of Charity.

It is gratifying to report, among the improvements of the past year, the completion of the "A. B. Miles" Surgical Amphitheatre and its thorough equipment in surgical and electrical appliances. It is abundantly supplied with light and with hot

and cold water. It has greatly increased the efficiency of the surgical work, and insures additional safety to patients undergoing operations. The debt incurred in its construction has been settled, save a small balance reserved for further investigation of accounts.

In the report of the House Committee will be found a detailed account of other improvements. Summarized, they consist of the purchase of a new and larger boiler; an extension of water mains; the fitting of a small apartment as a dressing room for the surgical floor; the placing of a hot-water sterilizer for the lower floor of the main building; the paving of the court yard and walks with Schillinger; the erection of storm doors to the front and side entrances of the main building; the opening of a new surgical ward; the purchase of three ambulance horses, and of a piece of property on Locust street.

An interesting telephone system will soon be established throughout the Hospital and its annexes, which will abate the annoyance of bell-ringing to summon students and employees, and will connect the House Officers with every department of the Hospital, insuring better service and more perfect discipline.

The Pathological and Bacteriological Department is still undeveloped. In view of the achievements in this branch of science, in the interest of humanity, it is essential to fully equip its laboratories and utilize the abundant material to be obtained in this institution.

As will be seen from the tabulated report of admissions for the past ten years there has been a steady annual increase.

In the House Surgeon's report it will be found that during the year 1895 the number of admissions exceed those of the preceding year by 748, and in the Out Clinics by 1614. This is the best evidence of the growing popularity of this institution and its appreciation by the general public in the absence of any unusual prevalence of disease. The necessity for some relief to the

over-crowding of wards, at times, is sensibly felt, as well as its bearing on the hygiene and sanitation of the Hospital. The purchase of additional land on Locust street and the erection of suitable buildings, would remedy this condition, provide for the isolation of contagious and infectious diseases, and furnish a home for our efficient corps of female nurses, whose number is inadequate for the lack of accommodation. It would prove a boon to this institution and greatly extend its sphere of usefulness. The success of the Female Training School and the improved and excellent nursing service which is, of such material advantage to the female patients, makes it incumbent on this Board to inaugurate a similar system for the male nurses, who are untrained and deficient in the necessary qualifications.

It is earnestly hoped and urged that this much needed reform, and the improvements suggested, will be initiated at as early a date as possible.

From the report of the Treasurer and Finance Committee, it will be seen, that from the auxillary sources, whence the Hospital derives a part of its income, there has been a marked falling off in its receipts of \$10,194.00 less than in 1894, from diminished fees from various sources. The disbursements have, on the contrary, been larger by \$13,564.54. The increased expenditure is attributable to the larger number of patients treated; to the incidental and additional requirements of the new amphitheatre; to the appointment of another assistant surgeon, and for repairs and renovation of the Hospital and its dependencies.

In view of the uncertainty of a fixed revenue from the sources mentioned, of increasing expenses from greater development, accretion of patients, and contemplated improvements, the attention of your Excellency, who has always manifested a lively interest in the welfare of this institution, is respectfully directed. Additional revenues will be needed to maintain the same standard of excellence and to preserve intact the reserve fund for improv-

ing the Hospital, as contemplated in the bequests and legacies of generous donors.

To the zealous and honored Sisters of Charity, whose lives and acts illustrate the Christian virtues, our warmest commendation is due for their unselfish devotion to duty, perfect system of domestic economy, and the admirable discipline they maintain in this great institution. To the members of the medical and surgical visiting staff, and to the corps of instructors in the training school, our thanks are due for their philanthropic co-operation and assistance in the care of the sick.

In the discharge of the responsible and varied duties of the medical officers of this institution, the House Surgeon, Dr. J. D. Bloom, and the two assistant House Surgeons, W. E. Parker and S. M. Fortier, have shown unremitting zeal and efficiency, and skilfully and humanely ministered to the sick and suffering.

Our thanks are also due and are hereby tendered to our able pathologist, Dr. O. L. Pothier, for his efficient services.

The assistance rendered by our courteous Secretary and Treasurer, Mr. Edwin Marks, who so carefully and worthily discharges the duties of his position, is cheerfully acknowledged.

The same is to be said of our engineer, Mr. John Ponder, who has always cheerfully responded to the demands on his time and practical knowledge.

The Druggist of the Hospital, Mr. John J. Simeon, has been faithful and efficient in the dispensing and compounding of drugs.

The Medical Students deserve to be commended for their gentlemanly deportment and strict attention to duty in the Hospital, Out Clinics and Ambulance service.

The Librarian, L. Justin, has given general satisfaction.

The Ambulance Corps has done faithful and satisfactory work.

The Board are specially indebted to our legal advisers, the eminent law firm of Messrs. Farrar, Jonas & Kruttschnitt, whose large and gratuitous services to the Hospital cannot be fully estimated.

Before closing my report I desire to express my sincere thanks to the different committees for their active and zealous co-operation in conducting the affairs of this institution and to my colleagues in general for their kind consideration and uniform courtesy.

Respectfully submitted,

ERNEST S. LEWIS, M. D.,

VICE PRESIDENT.

Annual Report of the House Committee.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, February, 3, 1896. }

To the Vice President and Board of Administrators :

Gentlemen—Your House Committee would respectfully report that the work of the past year, outside of the completion of the "A. B. Miles," Surgical Amphitheatre, has been important in its character.

A large new steam boiler of the tubular pattern with latest improvements, adequate to the increased demands of the Hospital, has been erected in the engine room, to replace a smaller one worn out in service.

A filter with a capacity of 40,000 gallons per day has been introduced. The water mains have been extended for fire purposes, with five additional fire plugs with 2-inch hose and nozzles attached.

One small room, situated on the surgical floor of the main building, has been fitted up with a modern sanitary system of lavatories, sinks, etc., all supplied with sterilized water.

Our hot water sterilizer has been introduced.

A considerable portion of the interior court yards and walks has been paved with Schillinger pavement.

Storm doors have been erected for front and rear entrances of the main building.

A complete system of inter-telephones have been ordered, by means of which all departments of the Hospital can be instantaneously communicated with.

The general repairs of the year have been extensive in their character and the entire Hospital has been repainted and renovated. The Outdoor Clinic buildings have been painted interiorly.

The Ambulance Service of the Hospital has been efficiently managed. The service has been improved by the purchase of three first-class horses in place of the same number unfit for further use. The ambulances have been kept in good repair.

Respectfully submitted,

JOHN T. GIBBONS,
A. R. BROUSSEAU,
WM. G. VINCENT.

Annual Report of the Finance Committee.

CHARITY HOSPITAL, }
STATE OF LOUISIANA, }
NEW ORLEANS, February 3, 1896. }

To the Vice-President and Board of Administrators:

Gentlemen—Your Finance Committee beg leave to report that the statements of the Treasurer correctly convey the condition of the Hospital for the year ending December 31, 1895, to which we beg to add that the expenditures of last year (1895) have been \$120,000.00. Our regular income from all sources (inclusive of donations and legacies, which were \$24,000.00), foot up \$134,000.00. If we deduct from this \$24,000.00 donations, etc., our net income would have been only \$110,000.00. Additionally, the contingent items of auction sales, licenses, etc., show a falling off, as compared with the previous year (1894), of \$10,000.00.

The result plainly shows that, unless contingent items improve, and donations and legacies remain the same, we would face a deficiency. It should also be remembered that money testated and donated by charitable individuals should only be used for the general improvement of the Hospital, which is still deficient in many departments. It is highly necessary that this Board make application to the General Assembly for an increased appropriation.

Respectfully submitted,

GEO. SEEMAN,
R. E. CRAIG.

Annual Report of the House Surgeon.

CHARITY HOSPITAL,
STATE OF LOUISIANA. }
NEW ORLEANS, February 3, 1896.

To the Board of Administrators:

Gentlemen—I have the honor to report upon the work of the Hospital for the past year, and to submit herewith the various departmental reports bearing upon the progress wrought in the different services.

On January 1, 1895, there were remaining in the Hospital 780 patients.

The admissions numbered 9812 during the year, of which 5687 were white and 4115 colored.

8485 patients were discharged, and the daily average was 705. There were remaining on January 1, 1896, 712 patients.

During the year 1423 deaths occurred; white 822, colored 601, a gross mortality of 13 per cent. Of this number 261 died within twenty-four hours of admission, and which deducted gives the mortality rate proper a little less than eleven per cent.

2731 cases were attended in the Accident Service of the A. B. Miles Amphitheatre.

The Maternity Department, in accord with the general increase of Hospital work, gives the record at 257 births, which is without precedent in any year previously reported.

The Hospital statistics presented direct attention to the enlarging field of work and to the confidence reposed by the unfortunate poor in the expediency of its service.

The once popular fallacy so prejudicial to the interest of those in need of hospital care, namely, the dread of hospital

confinement, is being rapidly dissipated ; and this, together with the manner in which their entrance into the institution is facilitated, succinctly explains the increasing number of admissions, and in all conditions of disease, that has been noticeably the fact during the year 1895. This prudent awakening to the value of scientific hospital attention will, I believe, become more markedly discernible from year to year, and must, in its proportionate increase, materially add to the running hospital expense.

In the Outdoor Clinics the visiting patients numbered 21,559, to whom medical relief was rendered, and 80,463 consultations given ; the attendance shows an increase over previous years.

The Ambulance Service has maintained favor for its prompt and reliable service, and nestles public confidence in the efficiency that has been preserved. The ambulance now in relay would prove of great usefulness if pressed into active service, thereby not only enlarging its advantages, but better systematizing the work. The corps answered 1421 calls during the year, and their faithfulness is specially commended.

The report of the Pathologist is herewith accompanied. This department bears essential purport to both medical and surgical work and its full equipment for pathological and bacteriological investigation will prove conducive to more definite results in every department.

The incentive to medical study and original research demand that the department be replete with modernized accessories, and I trust it will receive a full consideration.

Many of the recommendations urged in the monthly reports have been executed and the good effects noted. The furnishing of the institution with an intercommunicating telephone system, now under consideration, will replace the bell-ringing that has proven a noisy and indefinite method of expressing calls for assistance.

The past year witnessed the introduction of iron bedsteads throughout the entire building ; the opening of the A. B. Miles

Amphitheatre, and the graduation of the first class of Trained Female Nurses; three eventful affairs in the turn of enriching our institution with the requirements of modern medicine and surgery.

The necessity that at the present time exists of allowing the male nurses and employes to sleep in the various wards, seriously handicaps the service. The class of help secured under these conditions is necessarily unsatisfactory, and in great part unreliable, and it is not only an unrequited recompense for labor, but an injustice to the sick in the usual crowded condition of the wards. I would, therefore, strongly urge the construction of apartments for the male nurses and employes; this will allow of the inauguration of a Male Training School, in addition to the other benefits, and I can safely predict a more efficient, satisfactory and humane service than it is possible to attain by any other measure. With this accomplished, the service to the sick in all departments will be of great excellence and unsurpassed anywhere.

During the year the Hospital rendered its charity to 34,882 patients, an excess of 2757 over the previous year. The daily average of patients directs the necessity for a further increase in hospital accommodation, that is not only apparent but imperative.

In view of the early consummation of the pending purchase of the Locust street property, I beg to submit an outline of the distribution of the space available for the erection of hospital buildings:

ISOLATION BUILDING.

The benefits accruing in the special care, protection and immunity giving provisions, that would be made practicable, and implant the feeling of security in the care of such infectious diseases as are admitted under hospital rules, or detained through suspicion, marks the exigency of this requirement.

CHILDREN'S BUILDING.

A special building devoted to the care of white and colored

children, and separate from that of the adult patient, with an arrangement of play-room and refectory apart from the wards, and provision for the diversion and instruction in rudimentary schooling of the chronically ill and crippled children who are detained by their infirmities in the department, and thus deprived of primary educational advantages.

A HOME FOR TRAINED FEMALE NURSES.

The present quarters were provided as temporary, and are of limited capacity, necessarily restricting the progress and beneficial effects of the school. A separate building, devoted to their purposes would enhance, very materially, the service.

This disposition would make available hospital space to meet the demands of its increasing tax and lessen the necessity for much additional ward construction.

I regret that the Hospital's resources will not allow of the early construction of these necessary adjuncts. I believe, however, that the altruistic purposes and benefits conveyed will encourage our wealthy and philanthropic citizens to add memorials of their charity in the adornment of a cause so beneficent. Some open expression in acquainting the public of these contemplated improvements would not prove without avail.

The reports of the Training School for Female Nurses have been submitted through the Medical Committee and are corroborative of the wisdom of its organization and its helpful benefits.

Our Hospital Service, in its cleanly appointed detail and humane ministrations, exemplifies the good work of the Sisters of Charity, and the consoling influence of their presence toward inspiring whatever in womanly virtue is a solace to the afflicted and suffering.

Their services commends itself for a merited appreciation.

We record with much regret the death of Sister Jennette,

Sister Theresa and Sister Philomena, who served this institution forty-five, forty and twenty-four years, respectively, and whose memories are enshrined with deeds of Charity and Benevolence.

The death of Mr. Charles DeMahy, Clerk of the Hospital, was cause for much regret.

The Visiting Staff and Officers associated with me have rendered efficient service and are deserving of a full meed of praise.

Dr. S. M. Fortier and Dr. W. E. Parker, my assistants, actively aided in the work of the year.

The continued growth of the institution and the advantages entailed in the remodeling of its equipments apace with the demands of scientific progress and endemic necessities, bespeak the merit of an eleemosynary institution that is commendable for its charity, and in giving impetus to medical work, has elicited both gratification and gratitude of the medical profession.

Respectfully submitted,

J. D. BLOOM,

HOUSE SURGEON.

Pathological Department.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, February 3, 1896.

To the Board of Administrators of the Charity Hospital:

Gentlemen—I beg to submit the following report of work done in the Pathological Department during the year 1895 :

Specimens of Urine examined.....	1914
Specimens of Sputa examined	547
Specimens of Tumors examined.....	92
Specimens of Vomit examined	3
Specimens of Fluid examined	20
Specimens of Pus examined.....	11
Specimens of Hair examined	2
Specimens of Sediment from Hydrocele examined.....	1
Specimens of Blood examined.....	8
Specimens of Feces examined.....	1
Autopsies held.....	202
Photographs taken.....	114
Specimens permanently mounted for collection.....	62

In submitting this report I feel that, in justice to the department, I should call attention to some of the changes made during the past year and which increase the value of the department to the Hospital. The autopsies are now held directly under the supervision of the Pathologist, and the results are reported to the Physician in charge of the ward, so that the autopsy record is filed with the history of the case, at the same time it is kept in the books of the department. A change has also been made

in the method of examining specimens of tumors, they being cut by the freezing method which permits of giving a report much sooner than heretofore in the majority of cases, whereas by the paraffine method a whole week was necessary. The specimens for the collection, however, are made by the embedding process. A more accurate method for the examination of sputa has also been introduced. That of sedimentation by means of a carbolised solution, which facilitates and makes the finding of bacilli tuberculosis more accurate. I should also state here that we have now in the department a hæmacytometer and a hæmoglobinometer, which permits the accurate enumeration of blood corpuscles and the accurate estimation of hæmoglobin in the blood.

Notwithstanding the improvements made in the department during the past year many are still needed. The museum, for instance, has not been increased for the lack of proper museum jars; though specimens were kept they could not be prepared so as to keep permanently.

The want is also felt of a properly equipped Bacteriological department and of Microscopes for the more complete examination of specimens, especially so in the research of the plasmodium malariae and other micro-organisms.

In concluding my report I wish to commend the valuable assistance of Dr. S. F. Mioton, the Assistant Pathologist.

Respectfully,

O. L. POTHIER, M. D.

Report of the Directress.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, December 11, 1895.

Doctor E. S. Lewis and Doctor E. T. Shepard, Members of Medical Committee,
Charity Hospital Board of Administrators:

Gentlemen—I have the honor to report upon the progress of the Training School inaugurated under your counsel and guidance, and which, with this presentiment, bears evidence of its substantial strides in the direction of success and organization.

The opening of the School, in May, 1893, with a class of eleven pupils, four of whom were Sisters of Charity, and which continued in passive organization until January, 1894, foreshadowed its cause in the bright prospect of educational and charity interest.

In January, 1894, under the instruction of your committee and the personal direction of our dearly lamented, Dr. A. B. Miles, whose wisdom and generous impulses materialized our purpose and gave the impetus of strength to its existence, the classes were formed, and the following regulations framed :

REGULATIONS FOR NURSES ATTACHED TO CHARITY HOSPITAL.

Arrangements having been made for opening a Training School for Nurses, attached to Charity Hospital, women desirous of becoming professional nurses may enter the school for the course of two years' instruction on the following conditions :

Those wishing to enter the school should apply, either in person or letter, to Sister Agnes, Charity Hospital, upon whose approval they will be received into the school for one month on probation. The applicant should send, with answers to her

paper of questions, a letter from a clergyman testifying to her good moral character, and from a physician stating that she is in sound health.

It is indispensable that an applicant should have a fair English education—should be able to write legibly and accurately, to keep simple accounts, and take notes of lectures.

Sister Agnes has full power to decide as to their fitness for the work and the propriety of retaining or dismissing them. She can, also, at any time discharge them for misconduct or inefficiency.

During the month of probation the pupils are boarded and lodged at the expense of the school, but receive no other compensation. They are not expected to wear the uniform of the school, but must come provided with dresses of washing material for wear in the Hospital.

Those who prove satisfactory will be accepted as pupil nurses after signing the agreement to remain two years in the Training School and obey all the rules.

During the first year they will serve as assistants in the wards of the Charity Hospital; during the second year they may sometimes be sent out to private cases, either among the rich or poor.

The day nurses are on duty from 7 A. M. to 7 P. M., with an hour off each day for exercises and rest. They will sometimes be allowed an afternoon during the week and half of each Sunday.

The pay for the first year is \$8.00 a month and for the second year \$12.00 a month.

This sum is allowed for the dress, text-book and other expenses of the nurse in connection with her work, and is in nowise intended as wages, it being considered that the education given is a full equivalent for their services. They are required after the month of probation to wear the dress of the school, which is blue and white striped seersucker, simply made, large white apron with bib, white linen sleeves, collar and cap. All clothing must be plainly marked.

The institution is strictly unsectarian. There are no religious services connected with it, and all nurses are privileged to attend the place of worship they prefer once on Sunday.

COURSE OF TRAINING.

The instruction includes :

1. The dressing of blisters, burns, sores and wounds, the application of fomentations, poultices, etc.
2. The administration of enemata and use of catheter.
3. The management of appliances for uterine complaints.
4. The best method of friction to the body and extremities.
5. The management of helpless patients, making beds, moving, changing, giving bath in bed, and preventing and dressing bed sores.
6. Bandaging, making bandages and rollers, lining of splints.
7. The preparation of the different kinds of antiseptic dressings, bleaching of sponges, etc.
8. The preparing, cooking and serving of delicacies for the sick.

They will also receive instruction in the best practical methods of supplying fresh air, warming and ventilating sick-rooms in a proper manner, and are taught to take care of rooms and wards, to keep all utensils perfectly clean and disinfected ; to make accurate observations and reports to the physicians of the state of the secretions, expectoration, pulse, skin, appetite, temperature of the body, intelligence—as delirium or stupor—breathing, sleep—condition of wounds, eruptions, effect of diet, of stimulants or of medicines.

The above subjects relate to elementary matters in which the Superintendent of Nurses will daily instruct the pupils of the school.

The course of medical instruction will be conducted by the corps of instructors in didactic and practical teaching and by lessons at the bedside, to be given by the Superintendent with the aid of the head nurses of the different wards.

Lectures will be given twice a week by the physicians and surgeons appointed, and the nurses meet every day in class for lessons.

On leaving the school and after passing the final examination, they will each receive a diploma signed by the corps of instructors and the Superintendent of Nurses.

Miss Mary Agnes O'Donnell, a graduate of the Bellview Hospital Training School for Nurses, of New York City, was secured as Superintendent, and has very creditably conducted the work.

The lectures by the distinguished gentlemen of the Faculty, who have honored us with their countenance and instructive teaching, together with the daily class study conducted by the Superintendent, comprises the curriculum of didactic training during the course.

In the wards of the Hospital and the "A. B. Miles" Surgical Amphitheatre, the practical and bedside experience is acquired.

Supplementary to this thorough teaching and practical experience, has been added, a course in invalid cooking under the immediate tutorship of Mrs. E. L. Hoyle; making the facilities for learning such as to perfect the pupil, in the fullest sense, a trained nurse.

The stinted capacity of the present Home for Nurses has limited the number of admissions to twenty-six.

Since the inauguration of the School 257 applications were received. Of this number forty-six were admitted, seventeen were sent away after admission on account of condition of health or from lack of adaptability to the work. Three withdrew of their own accord, and thirteen graduate to-day with seven Sisters of Charity.

Of the thirteen remaining in the school, and in addition to which there are twelve Sisters of Charity in attendance, all are giving much satisfaction and the promise of great future good.

Contemplative of growth of the school in its benefits and wider distribution of usefulness, must be considered, the requirement of grounds ample for the erection of buildings adapted to the purposes of a Home, for their comfort, study and care. I beg, in this connection, to direct your attention to the limited accommodations in their present temporary home as a factor in influencing the early purchase of the Locust street property.

The personal interest so manifestly shown by our good, kind Governor and his worthy Board of Administrators fills me with gratitude, for which I desire to express sincere thanks.

I desire to commend, in highest praise, our ever-zealous corps of instructors, for their painstaking, untiring and appreciated work, that insured success to our institution.

To our most estimable House Surgeon, Dr. J. D. Bloom, and his able associates, Dr. W. E. Parker and Dr. S. M. Fortier, I feel grateful for material assistance in the conduct of the work of the school.

I feel, and I believe justly, proud of our class of pupils, whose deportment, industry and intelligence have won them the proud laurel of their professional ambition; and upon their entrance into the world in their commendable calling I can give them praise and my affection.

With my thanks to you, gentlemen of the committee, for your many kind indulgences and considerate actions, from which I received much encouragement, I trust the Charity Hospital Training School for Female Nurses will continue to rank in public favor as an educational and humane adjunct, the great work of our charity.

Respectfully submitted,

SISTER AGNES,
DIRECTRESS.

Report of the Chairman of the Faculty.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, December 11, 1895. }

Doctors E. S. Lewis and E. T. Shepard, Members of Medical Committee, Charity
Hospital Board of Administrators:

Gentlemen—Two years ago, on the urgent recommendation of Sister Agnes, Sister Superior and the present Directress of the School, and under the guidance of our departed friend, Dr. A. B. Miles, your Board of Administrators gave countenance to the inauguration of the Charity Hospital Training School for Female Nurses.

In reporting the work of these two years, it behooves the occasion to *preface my* remarks with the conditions that inspired, nurtured and developed the idea of organization that to-day sends forth its first blossoms to succor human-kind in the distress of illness.

The steady growth of this Hospital in its distribution of charity and in material structure has been patent.

A *discerning* appreciation of requirements, commensurate with increase in capacity and scope of dispensing charity, made apparent the necessity for a greater number of trained and skilled nurses. To Sister Agnes—for those motives that, woman-like, were marshalled in array through a conviction that meant a betterment in the service of the sick, and that afforded individuality and professional advantage to the Southern woman—we owe a just credit.

Clinical records substantiate the benefits accruing from a

nursing system thoroughly scientific and practically taught, and allows no misgivings as to its perfection in duty, or strength in organization.

Non-sectarian, thoroughly scientific, and broad in its extent of usefulness, are the substantial bearings that give it rank as an institution of the State, that must prove responsive to the pride of our people, and to the credit of your Board's able administration.

Pupil nurses are under kindly care and protection, comfortably housed, and under a simple school discipline.

The course of lectures inaugurated in January, 1894, was opened by Prof. Stanford E. Chaille, the other gentlemen of the Faculty following in alternate order.

An attendance of two sessions of ten months each is the requirements for graduation.

Lectures are given semi-weekly, and each member of the Faculty delivers ten lectures during the session.

Oral and written examinations are held at the expiration of each term, to test the competency and progress of the class.

The gentlemen of the Faculty have been ever ready to the call, and the efficiency of the present classes and high standard of the school are synonymous with their work.

The early resignation of Prof. S. E. Chaille was cause for much regret.

The death of our lamented Dr. A. B. Miles gave a poignant grief.

The resignation of Dr. W. S. Bickham is herewith submitted. The doctor has shown much enthusiasm in the work, and his resignation is received with regret.

I respectfully beg to recommend the election of Drs. W. E. Parker and S. M. Fortier as members of Faculty of Lecturers. Their aid and commendable interest in the school has assisted in its success.

The report of Sister Agnes, Directress, fully covers the curriculum in statistical detail.

The pupils of the graduating class:

Miss Theodora M. Anderson, Texas; Miss Lillie Bullard, Louisiana; Mrs. Ula Cloud, Georgia; Miss Emma Crossgrove, Louisiana; Miss Tillie K. Ferguson, Alabama; Miss Mary E. Johnson, Louisiana; Miss Mary E. Jolet, Louisiana; Miss Treacy Lipsey, Louisiana; Miss Mary A. McGinty, Mississippi; Miss Anna E. O'Donnell, New York; Miss Anna E. Riley, Louisiana; Miss Ada Robinson, Mississippi; Mrs. Sarah Walsh, Louisiana; Sister Angelica, Charity Hospital; Sister Avellina, Charity Hospital; Sister Benedicta, Charity Hospital; Sister Gonzaga, Charity Hospital; Sister Mary Xavier, Charity Hospital; Sister Mary Vincent, Charity Hospital; Sister Stanislaus, Charity Hospital, have stood creditably and satisfactorily in their final examination. As chairman of the Faculty, I most respectfully submit to you their names as being meritoriously worthy of the diploma and medal of the Charity Hospital Training School for Nurses.

In conclusion, I beg to remark that *paralleling* the administrative judgment, sagacity and philanthropy of your Executive Board, the progressive tendency of our Hospital, and this institution, has been marked, and that it reflects to the credit of our State and its efficient government.

Very respectfully,

J. D. BLOOM, M. D.,
CHAIRMAN OF FACULTY.

Operations on Female Organs of Generation—Continued.						
Abdominal Hysterectomy.....	3			3	6	Uterine Fibroids.
Vaginal Incision.....				1	1	Extra Uterine Pregnancy.
Excision.....	2	1			3	Uterine Polypus.
Enucleation.....	2				2	Sub-Mucous Fibroids.
Amputation of Cervix.....	1				1	Hypertrophy.
Dilatation and Curettage.....	1				1	Cervical Stenosis.
Vaginal Incision.....	2			1	3	Pelvic Abscess.
Urethral Caruncle.....	1				1	
Anterior Colporrhaphy.....	1				1	Cystocele.
Abdominal Incision.....				1	1	Suppurating Dermoid Cyst.
Curettage.....		3			3	Pyo-Salpinx.
Curettage.....	1				1	Obstructive Dysmenorrhœa.
Miscellaneous Operations—						
Thyroidectomy.....				1	1	Goitre-Tetanus.
Cheiloplasty.....	2				2	Hare Lip. Double.
Fistula in Arm.....	18				18	Incised and Cured.
Hemorrhoids.....	13				13	Ligation.
Thyroidectomy.....	1				1	Unilateral Cyst.
Hemorrhoids.....	2				2	Clamp and Cautery.
Tracheotomy.....				1	1	Oedema of Glottis.
Tenotomy.....	1				1	Talipes Varus.
Cleft Palate.....	2				2	Staphylorrhaphy.

Miscellaneous Operations—Continued.

Empyema.....	1	1	2 (Autrum of Highmore) Trepaning
Empyema. Frontal Sinus.....			1 Cerebral Abscess.
Tracheotomy.....	1		1 Stenosis Larynx.
Tracheotomy.....		1	1 Diphtheria.
Ophthalmic Operations—			
Enucleation.....	2		2 Suppuration of Orbit.
Enucleation.....	1		1 Sarcoma of Eye.
Enucleation.....	2		2 Pan-Ophthalmia.
Enucleation.....		1	1 Glioma of Retina.
Cataract.....	17	3	20
Cataract (needling).....	2		2
Tridectomy.....	2		2
Tridectomy.....	1		1 Glaucoma.
Pterygium.....	2		2 Removed.
Sclerotomy.....	2		2
Trephining—			
Skull.....			1 1 Frontal and Parietal Bones. Frontal Abscess.
Skull.....	1		1 Depressed Fracture. Gunshot Wound.
Skull.....	1	1	2 Gunshot Wound of Brain.
Skull.....	1		1 Comp. Depressed Fracture. Loss of Brain Substance.
Skull (Mastoid Region).....	3	1	4 Mastoid Disease.
Skull.....	13	2	17 Depressed Fracture. Compound.
Skull.....	2		2 Depressed Fracture. Simple.
Skull.....	1		1 Depressed Fracture. Frontal Bone.
Skull.....		1	1 Fracture at Base.
Skull.....		1	1 Fracture Frontal and Parietal Bones. Frontal Abscess.
Craniectomy.....	1		1 Arrested Development.
Laminectomy.....		1	1 Fracture of Lumbar Vertebrae.
Laminectomy.....		1	1 Fracture of First Lumbar Vertebrae.

SUMMARY OF OBSTETRIC CASES IN 1895.

There were 253 cases of Obstetrics.

White.....	142.	Multiparae.....	123
Colored.....	111.	Primiparae.....	130

PRESENTATIONS.

POSITIONS.

Vertex.....	239	{	Left Occipito-Anterior.....	118

				<hr/>
				5—18
				<hr/>
There were four cases of Breech.....				257

There were four cases of Twin Pregnancy.

MANNER OF DELIVERY.

Naturally.....	244
By Forceps	10
By Manual Traction.....	1
By Podalic Version.....	2

MORTALITY OF MOTHERS.

Of the 253 cases, 6 mothers died, making a mortality of little less than two and one-third per cent.

CAUSE OF DEATH.

Puerperal Eclampsia.....	2
Puerperal Septicæmia.....	2
Puerperal Peritonitis.....	1
Phtisis Pulmonalis.....	1

The number of children born were 257.

Male.....	127	Living.....	234
Female	127	Still-born.....	23
Uncertain (Abortions).....	3		

Most of the still-born children were delivered before the seventh month.
